A Prize in Honor of Michael D. Sturge xii

In Memoriam: Professor Gerald James Small xiv

Best Poster Prize of DPC'05 xvi

Dynamics of Highly Excited States and Nonlinear Effects

G. Zimmerer
Luminescence spectroscopy with synchrotron radiation: History, highlights, future 1

A. Nakamura, T. Tomikawa, M. Watanabe, Y. Hamanaka, Saito, H. Ago
Non-linear optical response and relaxation dynamics in double-walled carbon nanotubes 8

W. Jia, D. Jia, T. Rodriguez, D.R. Evans, R.S. Meltzer, W.M. Yen
UV excitation and trapping centers in $CaTiO_3:Pr^{3+}$ 13

E. Wu, V. Jacques, F. Treussart, H. Zeng, P. Grangier, J.-F. Roch
Single-photon emission in the near infrared from diamond colour centre 19

T. Hosoya, K. Tanaka, R. Fukaya, J. Takeda
Dynamics of high-density excitons in PbI_2 studied by two-photon absorption 24

D. Lo, V.N. Makhov, N.M. Khaidukov, J.C. Krupa
Two-photon excitation to $4f^6 5d$ configuration of Gd^{3+} in $LiGdF_4$ crystal by KrF excimer laser 28

Y. Kagotani, K. Miyajima, S. Saito, M. Ashida, T. Itoh
Temporal behavior of biexciton luminescence under two-photon excitation in CuCl quantum dots 33

P. Dereń, P. Goldner, O. Guillot-Noël
Green up-conversion emission in $LaAlO_3$ crystal doped with holmium ions 38

T. Koyama, Y. Takahashi, M. Nakajima, T. Suemoto
Wave-packet oscillation in the excited state of KBr F centers 43

N. Ohno
Time-resolved photoluminescence of exciton–polaritons in orthorhombic TlI 47

M. Shimizu
Long-range pair transport in graded band gap and its applications 51

D. Jia, X.-j. Wang, W. Jia, W.M. Yen
Temperature-dependent photoconductivity of Ce^{3+}-doped $SrAl_2O_4$ 55

T. Ejima, T. Banse, H. Takatsuka, Y. Kondo, M. Ishino, N. Kimura, M. Watanabe, I. Matsubara
Microscopic optical and photoelectron measurements of MWO_4 (M = Mn, Fe, and Ni) 59

F. Pellé, T. Aitasalo, M. Lastusaari, J. Niittykoski, J. Hölsä
Optically stimulated luminescence of persistent luminescence materials 64

E. Hayashi, K. Ito, S. Yabashi, M. Yamaga, N. Kodama, S. Ono, N. Sarukura
Vacuum ultraviolet and ultraviolet spectroscopy of $BaMgF_4$ codoped with Ce^{3+} and Na^+ 69

Macromolecules Spectroscopy and Biomedical Optics

I. Georgakoudi
The color of cancer 75

C.-C. Chang, J.-F. Chu, H.-H. Kuo, C.-C. Kang, S.-H. Lin, T.-C. Chang
Solvent effect on photophysical properties of a fluorescence probe: BMVC 84

U. Kleinekathöfer, G. Li, M. Schreiber
Density matrix theory for reductive electron transfer in DNA 91

Y. Zhang, X. Yan, C. Liu, R. Dang, X. Zhang
Photoluminescence of acupoint "Waiqiu" in human superficial fascia 96

O.J.G. Somsen, G. Trinkunas, M.N. de Keijzer, A. van Hoek, H. van Amerongen
Local diffusive dynamics in DNA: A time-resolved fluorescence and molecular-dynamics study of dinucleotides with 2-aminopurine 100

G. Trinkunas, A. Freiberg
A disordered polaron model for polarized fluorescence excitation spectra of LH1 and LH2 bacteriochlorophyll antenna aggregates 105

F. Auzel, G. Baldacchini, T. Baldacchini, P. Chiacchiaretta, R. Balaji Pode
Rayleigh scattering and luminescence blue shift in tris(8-hydroxyquinoline)aluminum films 111

B. Li, R. Tong, R. Zhu, J. Hua, H. Tian, S. Qian
The ultrafast dynamics and nonlinear optical properties of tribranched conjugated polymers with triphenylamine as the core 116

N. Hamada, K. Matsumoto, K. Soda, R. Nakamura, H. Ichida, F. Tokunaga, Y. Kanematsu
Inhomogeneity observed in the photocycle of photoactive yellow protein 122

T. Tsuboi, N. Aljaroudi
Relaxation processes in the triplet state T_1 of organic Ir-compound $Btp_2Ir(acac)$ doped in PC and CBP fluorescent materials 127

C. Liu, Y. Zhang, X. Yan, X. Zhang, C. Li, W. Yang, D. Shi
Infrared absorption of human breast tissues in vitro 132

H. Kondo, A. Takeda, T. Tomikawa, H. Kurisu, S. Yamamoto, M. Matsuura
Cavity modes of exciton–polaritons in an organic crystal with distributed Bragg reflectors 137

Q.L. Song, H. Yang, H.R. Wu, F.Y. Li
Optical interference effect in layered organic materials studied by UV–Vis absorption spectroscopy 142

I. Zareba-Grodz, R. Pazik, K. Hermanowicz, W. Strek, K. Maruszewski
Preparation and optical properties of hybrid coatings based on epoxy-modified silane and rhodamine B 148

Spectroscopy of Single Molecules and Nanostructures

H. Zheng, X.-j. Wang, S.-X. Qu, M.J. Dejneka, R.S. Meltzer
Dynamical processes of Ln^{3+} ions doped in LaF_3 nanocrystals embedded in transparent oxyfluoride glass 153

Y. Kanemitsu, A. Ishizumi
Luminescence properties of impurity-doped semiconductor nanoparticles 161

M. Steiner, F. Schleifenbaum, C. Stupperich, A.V. Failla, A. Hartschuh, A.J. Meixner
A new microcavity design for single molecule detection 167

T. Tani, M. Oda, K. Mashimo, F. Tachibana, H. Horiuchi
Single-molecule imaging towards precise detection of individual photophysics 173

A. Kanno, Y. Masumoto
Highly sensitive time-resolved Kerr rotation measurements on single-layer quantum dots 178

F.Z. Wang, Z.H. Chen, J. Sun, L.H. Bai, S.H. Huang, H. Xiong, P. Jin, Z.G. Wang, S.C. Shen
Temperature and power-density-dependent inter-shell energy states in InAs/GaAs quantum dots 183

T. Ogawa, A. Ishikawa, S. Saito
Full quantum-mechanical treatment for spatiotemporal dynamics of electrons and holes in a quantum wire coupled to a thermal reservoir 188

H. Xiong, Z.H. Chen, K. Hyomi, I. Souma, Y.N. Zhang, L.X. Sun, Q.J. Ren, L.H. Bai, S.H. Huang, F.Z. Wang, A. Murayama, Y. Oka, S.C. Shen
Coupling of quantum states in a single CdSe/ZnSe quantum dot molecule 193

S.H. Huang, Z. Chen, F.Z. Wang, S.C. Shen, H.H. Tan, L. Fu, M. Fraser, C. Jagadish
Carrier transfer and magneto-transport in single modulation-doped V-grooved quantum wire modified by ion implantation 198

A. Hartschuh, H. Qian, A.J. Meixner, N. Anderson, L. Novotny
Nanoscale optical imaging of single-walled carbon nanotubes 204

R. Dědic, M. Kořínek, A. Molnár, A. Svoboda, J. Hála
Singlet oxygen quenching by oxygen in tetraphenyl-porphyrin solutions 209

D. Kim, T. Kuwabara, M. Nakayama
Photoluminescence properties related to localized states in colloidal PbS quantum dots 214

D. Hreniak, A. Speghini, M. Bettinelli, W. Strek
Spectroscopic investigations of nanostructured $LiNbO_3$ doped with Eu^{3+} 219

B. Mercier, C. Dujardin, G. Ledoux, C. Louis, O. Tillement, P. Perriat
Confinement effects in sesquioxydes 224

Y.M. Lu, H.W. Liang, D.Z. Shen, Z.Z. Zhang, J.Y. Zhang, D.X. Zhao, Y.C. Liu, X.W. Fan
Excitonic properties of vertically aligned ZnO nanotubes under high-density excitation 228

Y. Feng, Y. Zhou, Y. Liu, G. Zhang, X. Zhang
Photoluminescence spectra of nano-structured ZnO thin films 233

J. Zhou, F. Zhao, X. Wang, Z. Li, Y. Zhang, L. Yang
Template synthesis and luminescent properties of nano-sized YAG:Tb phosphors 237

Y.J. Zhang, C.S. Xu, Y.C. Liu, Y.X. Liu, G.R. Wang, X.W. Fan
Temperature-enhanced ultraviolet emission in ZnO thin film 242

J. Zhou, Y. Wang, F. Zhao, Y. Wang, Y. Zhang, L. Yang
Photoluminescence of ZnO nanoparticles prepared by a novel gel-template combustion process 248

Q.X. Guo, Y. Hachiya, T. Tanaka, M. Nishio, H. Ogawa
Cathodoluminescence study of anodic nanochannel alumina 253

G. De, W. Qin, J. Zhang, J. Zhang, Y. Wang, C. Cao, Y. Cui
Upconversion luminescence properties of Y_2O_3:Yb^{3+}, Er^{3+} nanostructures 258

Energy Transfer and Electron–Phonon Interactions

Y. Zhou, S.P. Feofilov, J.Y. Jeong, D.A. Keszler, R.S. Meltzer
Quantum cutting in $Gd_xY_{1-x}LiF_4$: Nd—dynamics and mechanisms 264

D.J. Heijs, V.A. Malyshev, J. Knoester
Exciton dephasing and thermal line broadening in molecular aggregates 271

M. Litinskaya, P. Reineker, V.M. Agranovich
Exciton–polaritons in organic microcavities 277

I. Akai, A. Okada, K. Kanemoto, T. Karasawa, H. Hashimoto, M. Kimura
Quenching of energy transfer by freezing molecular vibrations in light-harvesting small dendrimer 283

T. Tsuboi
Electronic states of phosphorescent molecules $Ir(ppy)_3$ and PtOEP used in organic light emitting diodes 288

Ph. Goldner, O. Guillot-Noël, A. Louchet, F. de Sèze, V. Crozatier, I. Lorgeré, F. Bretenaker, J.L. Le Gouët
Hole burning study of Tm^{3+}:YAG hyperfine structure for quantum storage applications 293

J.L. Hughes, P.J. Smith, R.J. Pace, E. Krausz
Spectral hole burning at the low-energy absorption edge of photosystem II core complexes 298

D. Zhao, B. Li, C. Wu, Y. Lu, D. Shen, J. Zhang, X. Fan
Temperature dependence of carrier transfer and exciton localization in ZnO/MgZnO heterostructure 304

Z. He, X.-j. Wang, W.M. Yen
Investigation on charging processes and phosphorescent efficiency of $SrAl_2O_4$:Eu,Dy 309

J.G. Solé, M. de la O Ramírez, A. Ródenas, D. Jaque, L. Bausá, M. Bettinelli, A. Speghini, E. Cavalli, L. Ivleva
Bistable luminescence of trivalent rare-earth ions in crystals 314

J. Ishi-Hayase, K. Akahane, N. Yamamoto, M. Kujiraoka, J. Inoue, K. Ema, M. Tsuchiya, M. Sasaki
Coherent dynamics of excitons in a stack of self-assembled InAs quantum dots at 1.5-μm waveband 318

T. Kishimoto, H. Takahashi, A. Hasegawa, F. Minami
Coherent pulse propagation in GaSe 323

R. Zhong, J. Zhang, X. Zhang, S. Lu, X.-j. Wang
Energy transfer and red phosphorescence in strontium aluminates co-doped with Cr^{3+}, Eu^{2+} and Dy^{3+} 327

Z. Nie, J. Zhang, X. Zhang, Y. Luo, S. Lu, X. Wang
Energy transfer in Pr^{3+}- and Cr^{3+}-codoped $SrAl_{12}O_{19}$ system 332

C. Supritz, A. Engelmann, P. Reineker
Energy transport in dendrimers 337

J. Zhang, W. Qin, D. Zhao, G. De, J. Zhang, Y. Wang, C. Cao
Energy transfer processes on both Er^{3+} ion concentration and excitation densities in Yb^{3+}–Er^{3+} codoped LaF_3 matrix 341

N. Arai, J. Takeda, H.-J. Ko, T. Yao
Dynamics of high-density excitons and electron–hole plasma in ZnO epitaxial thin films 346

W. Liu, Y. Liu, L. Guo, C. Xu, S. Qian
The mutation of carotenoids affects the energy transfer in LH2 light harvesting complexes from *Rhodobacter sphaeroides* 601 at room temperature 350

W. Qin, S. Huang, G. Du, J. Zhang, G. De, J. Zhang, Y. Wang, C. Cao, S. Lu
Anti-Stokes fluorescent cooling by energy transfer 356

Ultrafast Phenomena and Phase Transition

H. Oyanagi, T. Tayagaki, K. Tanaka
Synchrotron radiation study of photo-induced spin-crossover transitions: Microscopic origin of nonlinear phase transition 361

G. You, P. Zhou, C. Zhang, Z. Dong, L. Chen, S. Qian
Ultrafast nonlinear optical response of silver/bismuth oxide nanocomposite films with different silver concentrations 370

R. Lu, M. Hase, M. Kitajima, S. Nakashima, S. Sugai
Femtosecond pump–probe study of coherent soft phonon in $Pb_{1-x}Ge_xTe$ ferroelectrics 378

J. Amami, D. Hreniak, Y. Guyot, R. Pazik, C. Goutaudier, G. Boulon, M. Ayadi, W. Strek
Second harmonic generation and Yb^{3+} cooperative emission used as structural probes in size-driven cubic–tetragonal phase transition in $BaTiO_3$ sol–gel nanocrystals 383

H. Liu, S. Lysenko, A. Rua, V. Vikhnin, O. Vasquez, F.E. Fernandez
Eu-emission quenching by electron screening in VO_2 thin films 388

Z.A. Xu, X.F. Xu, G. Lüpke, Y.H. Ren
Low-energy collective excitations in a charge–density wave conductor $K_{0.3}MoO_3$ 395

Y. Ogawa, J. Nakagawa, F. Minami
Intensity and phase evolutions of transmitted and reflected femto-second optical pulses in GaAs 399

H. Liu, S. Lysenko, A. Rua, V. Vikhnin, G. Zhang, O. Vasquez, F.E. Fernandez
Laser excitation and excited state dynamics in vanadium dioxide thin film 404

E.P. Petrov, F. Cichos, C. von Borczyskowski
Intrinsic photophysics of semiconductor nanocrystals in dielectric media: Formation of surface states 412

K. Kayanuma, K. Seo, K. Nishibayashi, A. Murayama, Y. Oka, I.A. Buyanova, W.M. Chen
Transient photoluminescence spectroscopy of spin injection dynamics in double quantum wells of diluted magnetic semiconductors 418

Y. Hamanaka, K. Fukagawa, Y. Tai, J. Murakami, A. Nakamura
Ultrafast relaxation dynamics of electrons in Au clusters capped with dodecanethiol molecules 423

M. Kasami, T. Ogino, T. Mishina, S. Yamamoto, J. Nakahara
Femtosecond pump–probe studies of phonons and carriers in bismuth under high pressure 428

K. Nishibayashi, I. Aoshima, I. Souma, A. Murayama, Y. Oka
Pump–probe spectroscopy of spin-injection dynamics in double quantum wells of diluted magnetic semiconductor 433

I. Aoshima, K. Nishibayashi, I. Souma, A. Murayama, Y. Oka
Ultrafast spin injection from $Cd_{1-x}Mn_xTe$ magnetic barriers into a CdTe quantum well studied by pump–probe spectroscopy 437

R. Nakamura, P. Wang, R. Fujii, Y. Koyama, H. Hashimoto, Y. Kanematsu
Vibrational relaxation pathways in the electronic excited state of carotenoid 442

M. Nakajima, K. Kazumi, M. Isobe, Y. Ueda, T. Suemoto
Photo-induced phenomena in NaV_2O_5 studied by time-resolved Raman spectroscopy 448

T.P.J. Han, F. Jaque, D. Jaque, J. García-Sole, L. Ivleva
Luminescence life time and time-resolved spectroscopy of Cr^{3+} ions in strontium barium niobate 453

H. Ichida, K. Mizoguchi, D. Kim, Y. Kanematsu, M. Nakayama
Temperature dependence of dynamical processes of photoluminescence from exciton–exciton scattering in CuI thin films 457

Theory and Calculation

S. Welack, U. Kleinekathöfer, M. Schreiber
Laser-driven molecular wires studied by a non-Markovian density matrix approach 462

P. Huai, T. Ogawa
Absorption and gain spectra of optically excited semiconductor quantum wires: Effects of Coulomb correlation and screening 468

J.W. Wang, R. Turos-Matysiak, M. Grinberg, W.M. Yen, R.S. Meltzer
Mixing of the $f^2(^1S_0)$ and 4f5d states of Pr^{3+} in $BaSO_4$ under high pressure 473

O. Guillot-Noël, Ph. Goldner, M. Popova
Electromagnetically induced intrinsic bistability at the atomic level 478

M. Bednarz, P. Reineker
A novel approach to probe the presence of correlation in energetic disorder: A theoretical study 482

A. Iwamatsu, Y. Ogawa, Y. Mitsumori, F. Minami
Non-Markovian dephasing of excitons in GaAs quantum wells 487

F. Liu, J.-h. Zhang, S.-z. Lu, S.-x. Liu, S.-h. Huang, X.-j. Wang
Selection rules for $4f^2 \rightarrow 4f^2$ electric dipole transitions by considering mixing with 4f5d components of Pr^{3+} in $SrAl_{12}O_{19}$ 492

P. Heřman, I. Barvík, D. Zapletal
Energetic disorder and exciton states of individual molecular rings 496

I. Barvík, Ch. Warns, P. Reineker
Optical line shape of molecular rings: Influence of correlated nondiagonal disorder 504

A. Sato, J. Ishi-Hayase, F. Minami, M. Sasaki
Quantum beat and entanglement of multi-qubits interacting with a common reservoir 508

J.-L. Xiao, Y.-L. Huang, C.-L. Li
Properties of transmission of electron in coupled rings 513

S.-Y. Wu, H.-N. Dong
Theoretical studies on the spin Hamiltonian parameters of Er^{3+} in $Er_xY_{1-x}Ba_2Cu_3O_6$ 517

R. Zhu, X. Qiu, Y. Chen, S. Qian
Effect of axial substitution on the ultrafast dynamics and third-order optical nonlinearity of metallophthalocyanines films 522

Other Related Topics

G. Sun
Design of unipolar intersubband lasers for terahertz emission 528

D.R. Evans, G. Cook, J.L. Carns, M.A. Saleh, S.A. Basun, J.M. Seim, G.J. Mizell
Understanding the optical and electrical properties of a new photorefractive potassium niobate crystal 535

Organometallic compounds 127, 288
Oxyfluoride glass ceramics 153

PbGeTe 378
PbS 214
$PbWO_4$ 590
Periodic gain structure 556
Perovskite 38
Persistence phosphors 309
Persistent current 513
Persistent phosphors 327
Phase evolution 399
Phase transitions 383, 388, 404, 478
Phase-space filling 468
Phosphor nanoparticle 237
Phosphorescence 127, 209, 288
Photo-excited carrier 428
Photo-induced phase transition 448
Photo-induced spin-crossover transition 361
Photo-modulated reflectance 546
Photoactive yellow protein 122
Photoconductivity 55
Photoelectron spectra 59
Photoluminescence 13, 96, 111, 183, 193, 214, 233, 237, 412, 546, 570, 581
Photoluminescence decay 412
Photoluminescence properties 248
Photon cascade emission 332
Photophysical properties 84
Photorefractive 535
Photostimulated luminescence 64
Photosynthesis 298, 504
Photosynthetic antenna aggregates 105
Photosystem II 298
Photovoltaic 535
PL 242
Planar waveguide 560
Polariton beat 399
Polarons 105
Polymer 116
Population inversion 33
Pore size 253
Potassium niobate 535
Pr^{3+} 473, 492
PtOEP 288
Pulsed laser deposition 581
Pump-probe 388
Pump–probe spectroscopy 423, 433, 437, 522

Quantum beat 508
Quantum cascade laser 528
Quantum confinement 161, 224, 468
Quantum dot molecule (QDM) 193
Quantum dots 178, 183, 214, 318, 412, 565
Quantum efficiency 309
Quantum splitting 264
Quantum storage 293
Quantum waveguide theory 513
Quantum well 437
Quantum wire 198
Quenching by oxygen 209
Quenching of energy transfer 283

Rare earth 55
Rare earth co-doping 64
Rare earth ions 478
Rare-earth 219
Rate equations 127
Rayleigh scattering 111
Reflectance 75
Resonant raman scattering 47

Scanning and transmission electron microscopy 258
Selection rules 492
Self-trapped exciton 590
Semiconductor Bloch equations 468
Semiconductor nanostructures 253
Semiconductor quantum wire 468
Sensor 585
Silanization 173
Silicon 528
Single fluorescence emitter 19
Single molecules 167
Single-molecule detection 173
Single-walled carbon nanotubes 204
Singlet oxygen 209
Size and morphology 258
Size effect 219
Soft mode 378
Sol–gel 560, 585
Sol–gel process 148
Solvent effect 116
Spectral hole burning 298
Spectroscopy 75
Spin dynamics 433
Spin injection 418, 433, 437
Spin ladder system 448
Spin precession 178
Spin relaxation 178, 437
Spin superlattice 541
$SrAl_{12}O_{19}$ 332
$SrAl_2O_4$:Eu,Dy 309
Star-shaped stilbenoid phthalocyanine 283
States mixing 473, 492
Static disorder 271
Stimulated emission 228
Stretched exponential 100
Strontium aluminates 64, 327
Superficial fascia 96
Superradiance 33
Superradiation process 228
Surface plasmon 423
Synchrotron radiation 1, 132, 361

Temperature dependence 253, 283
Temperature-dependent photoluminescence 242
Template combustion synthesis 248
Template synthesis 237
Terahertz emission 528
Tetramethylrhodamine 173
Thermal oxidation 242

Thermoluminescence 13, 590
Thin films 233, 388, 404, 581
Time-dependent density functional theory 522
Time-resolved florescence 350
Time-resolved fluorescence 116, 442
Time-resolved Kerr rotation 178
Time-resolved luminescence spectroscopy 43
Time-resolved photoluminescence 47, 551
Time-resolved PL spectra 457
Time-resolved Raman spectroscopy 448
Time-resolved spectroscopy 323, 487
Time/space-resolved optical spectra 188
TlI 47
TPP 209
$TPPS_4$ 209
Transfer matrix 142
Transient infrared absorption 590
Transition-metal tungstates 59
Transmission 323
Trapping centers 13
Tribranched 116
Trivalent gadolinium ion 28
Tunable laser 69
Two-beam coupling 535
Two-photon absorption 24
Two-photon excitation 33
Two-photon fluorescence 116

Ultrafast 370
Ultrafast dynamics 116, 522
Ultrafast electron relaxation dynamics 423
Up-conversion 38
Up-conversion method 43
Up-converter 51
Upconversion luminescence 341
Upconverted UV/VUV luminescence 28
UV–Vis spectroscopy 142

Van Hove singurality 8
VCSELs 556
Vibrational relaxation 442
VO_2 388, 404
VUV 233

"Waiqiu" acupoint 96

X-ray absorption spectroscopy 361
XFROG 399

Y_2O_3 nanostructures 258
YAG 576
YAG:Tb 237

Z-scan 522
ZnMnTe/ZnMgTe 541
ZnO 233, 242, 248, 304, 346
ZnO nanotube 228
ZnO/MgZnO heterostructure 551
